

CARBON MONOXIDE & SMOKE DETECTORS

Please note that functioning smoke and carbon monoxide detectors have been installed in your apartments and have been tested.

If your battery is low, the detector will start making periodic noises. Should your detector become sensitive to smoke and steam and tend to go off when it should not, your smoke detector itself is bad. Please call and we will replace it.

Although we will periodically be checking the detectors to ensure they are functioning properly, it is the tenant's responsibility to check the batteries once a month, preferably the first of the month and replace the power source (battery) if the level is low. It is the tenant's responsibility to replace nonfunctioning batteries.

My signature below indicates my understanding and compliance with the information above. It further represents my agreement to maintain a working smoke detector with an acceptable battery level.
